Homeopathic Plant Remedy

Our breakthrough product, Organic Disease Control (ODC™) has proven to be very effective at controlling pine beetle infestation. Research and testing by Colorado State University and the U.S. Forest Service, along with homeowners and business owners, have discovered how well it works.

But ODC™ is not limited to just pine beetle control. It has also been shown to be an extremely effective homeopathic remedy by stimulating the plants immune-like system. Plants treated with ODC™ grow faster and become more disease and insect resistant. Gardeners are singing the praises of this product!
